Waterbouwer in beeld: Koninklijke Smals moet en kan groener

Koninklijke Smals heeft zich sinds de oprichting in 1985 ontwikkeld van een nationale zand- en grindwiner tot internationale specialist in duurzaamheidsdredging en waterbouwoplossingen. Smals Verhuur en Smals Bouwgrondstoffen. We begonnen in Lelystad en groeiden uit naar heel Nederland, België, Frankrijk, Italië, Spanje, Duitsland, Oostenrijk, Polen, Nederland en Duitsland. Smals is nu een wereldwijde organisatie met meer dan 100 vestigingen wereldwijd. Dit succes is niet alleen te danken aan de kwaliteit van ons werk, maar ook aan de innovatie en de inzet van onze medewerkers. We zijn trots op onze medewerkers en de impact die we samen maken op de wereld. We willen graag weten hoe we ons kunnen verbeteren en hoe we nog meer kunnen bijdragen aan een duurzame wereld. We zijn blij met alle feedback en zien ernaar uit om samen met u de toekomst te bouwen.

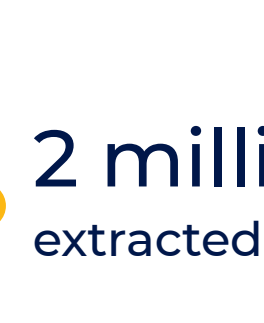

Internship market

Own branches in
Netherlands • Germany
• United Kingdom

Total dredged
4,316,000 m³

2 million tonnes
extracted construction sand

Area development

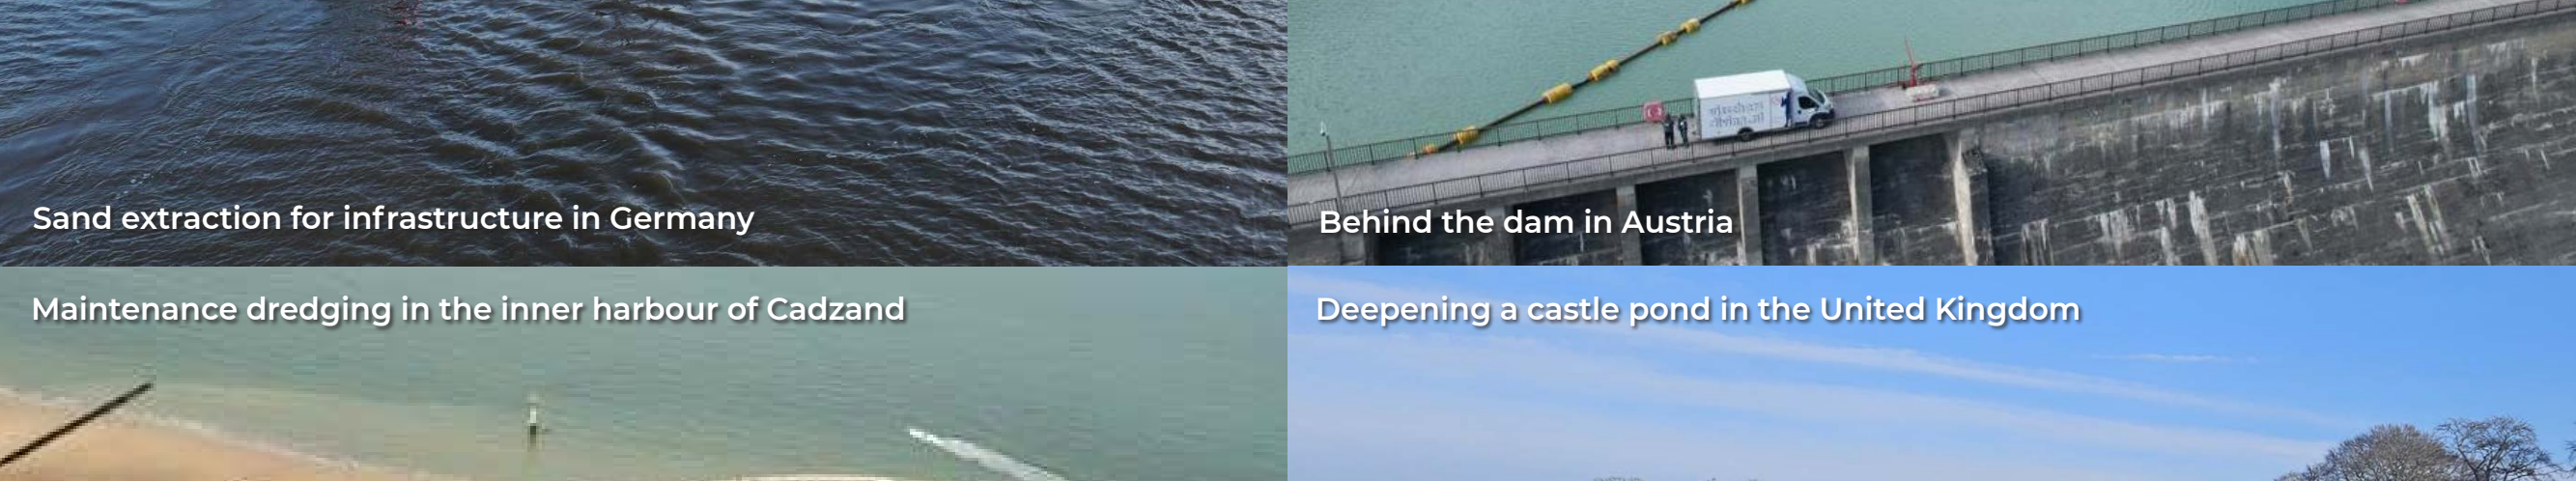

Participation process in Echten started
